

Table of contents

Executive summary.....	11
1. Renewable electricity forecast.....	15
Highlights.....	15
Recent deployment trends.....	16
Forecast summary	17
China.....	25
Asia-Pacific.....	30
North America.....	36
Europe.....	41
Latin America	51
Sub-Saharan Africa.....	54
Middle East and North Africa	58
References	64
2. Distributed solar PV.....	65
Highlights.....	65
Why focus on distributed solar PV?	66
Distributed PV history and the situation today	67
Economic attractiveness of distributed PV	75
Distributed PV forecast.....	81
Implications for policy making	100
References	105
3. Transport biofuels	107
Highlights.....	107
Renewable transport overview.....	108
Focus on HVO.....	119
Advanced biofuels markets.....	123
References	128
4. Renewable heat	129
Highlights.....	129
Global overview and outlook.....	130
Buildings	135
Industry	145
References	151
5. Renewable energy trends to watch	153
Key questions.....	153
What are the trends for remunerating renewable electricity in the next five years?.....	154
Is the ageing of renewable capacities during 2019-24 a concern?.....	158
How have macroeconomic factors affected renewable capacity financing costs since 2015?.....	161
Does security of supply drive key biofuel markets in Asia?	163
What end uses will stimulate biogas production growth?	165
Should grid integration be a concern for policy makers in countries with low wind and solar deployment?	169
What will be the role of hydrogen in renewable energy deployment by 2024?	172
Has energy efficiency helped EU countries reach renewable energy targets?.....	175

How can district heating help decarbonise the heat sector by 2024?	178
How big is the mineral resource footprint of renewable electricity development?	181
References	184
6. Data tables	187
Annexes	195
Glossary	195
List of acronyms, abbreviations and units of measure	197

List of figures
